

For Immediate Release

Introducing Troemner's New Individual Weight Cases

Troemner, the world's leading manufacturer of precision weights and provider of calibration services, is proud to announce the release of its new line of Individual Weight Cases. Troemner weight cases are designed to hold weights ranging from 1mg to 2kg and are constructed of high quality polycarbonate. The cases are designed with a locking lid and custom bumper to assure weights are held securely in place. Weight cases are designed with custom inserts specific to the style and size of the weight. Troemner uses (3) colors to denote the style of weight contained in each case; red cases hold Troemner Alloy 8 Precision Analytical Calibration Weights, blue cases hold Troemner Electronic Balance Calibration Weights, and orange cases hold Troemner OIML style weights. Cases are designed with clear lids so weights are easily identified while in case without removing the lid. Visit www.troemner.com/individual_weight_cases.php for complete details or contact a Troemner Representative at 1.800.352.7775 or via e-mail at troemner@troemner.com.

Troemner continues to be the premier company in the metrology industry and now has the following calibration services available to our customers; Weight, Pipette, Temperature, Pressure, Humidity, Mass Flow, Dimensional, Electrical, Time and Frequency. Visit us at www.troemner.com or call 1.800.352.7775 to place an order for any of these calibration services.
